

Once there was a child who had a gigantic ball. The ball was made of metal and was so big that it could knock down houses. It was so strong that it could not be broken. One day the ball rolled down a hill. The ball was headed towards a house. If the ball was not stopped, it would hit the house and the person inside would fall down. But Super Manuela saw the ball. She flew super fast and stopped the ball. All the people were happy that the ball was stopped and they were all safe at last.
