

# MY CLASSROOM

---

by  
Jasper Au Yeung  
2E

I want to design a classroom that is all about space and universe. It is because I would like my classmates to learn about astronomy. The tables are moon shaped and the chair backs are rocket shaped. To make the classroom more space alike, there are drawings of different planets on the walls with a lighting system offering diverse colour modes – the normal mode in white colour to be used during lessons and other colours are used during movie time. The classroom door and windows will be framed with outer space decorations as well. Let's explore space and have fun!

# THE END
